INTERACTIVE INDEX

Please click on the Sample beside the Finish Name to scroll to the specific finish page

Click on the Home button to return back to the Finish Index.

CLICK HERE

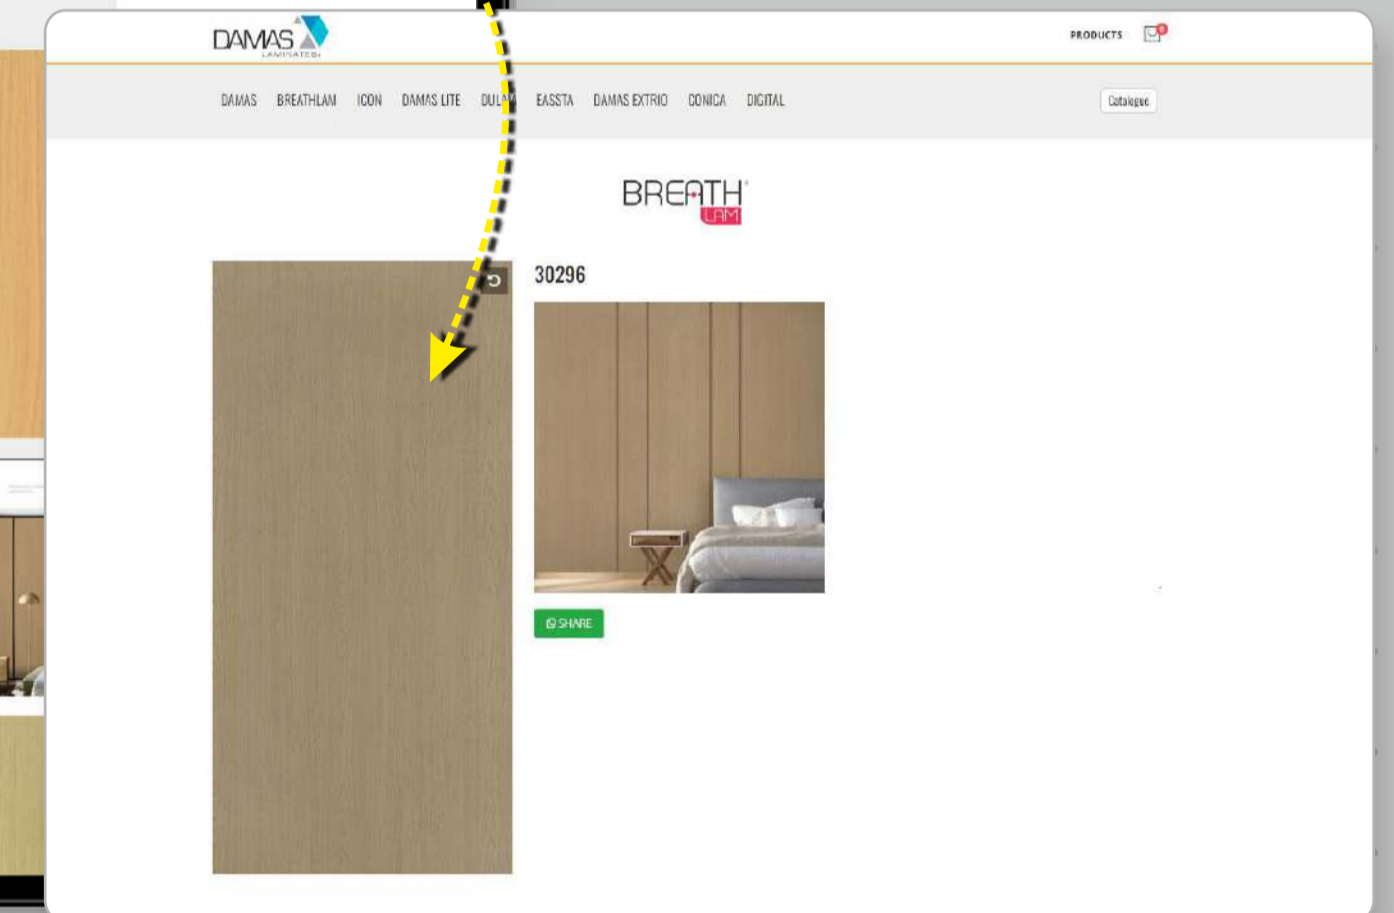

1. Open downloaded e-PDF on any device.
2. Browse through our entire collection right on your fingertips.
3. Like a product or design? Click anywhere on the product to open its dedicated webpage.
4. Here you will find the following details about the

Product you chose:

- Full Sheet View
- Application Preview
- Available Textures
- Technical Details
- Option to send an enquiry

5. You can find the same information about all the products in the PDF by clicking on them.

PROPERTIES	SPECIFIED VALUES AS PER IS 2046-1995 TYPE S,V,G,S	BREATHLAM CONFORMS
Thickness	1.0mm (± 10%)	1.0mm (± 10%)
Resistance to surface Wear	> 150(revolutions)	✓
Resistance to immersion in boiling water		
-Mass increase (%)	10.0%(Max)	✓
-Thickness increase	11.8%(Max)	✓
-Appearance	Not worse then 4	✓
Dimensional stability at deviated temperature		
-Longitudinal (%)	0.55% (Max)	✓
-Transverse (%)	1.025%(Max)	✓
Dimensional stability at 200C		
-Longitudinal (%)	0.375%(Max)	✓
-Transverse (%)	0.60% (Max)	✓
Resistance to impact by small diameter ball	20 N (Min)	✓
Resistance to Cracking	Not worse then 4	✓
Resistance to scratching	1.75 N (Min)	✓
Resistance to staining	Not worse then 5	✓
Resistance to color change (Wool standard)		
- In Xenon ARC light	Not worse then 6	✓
- In Enclose Carbon ARC light	Not worse then 5	✓
Resistance to steam	Not worse then 4	✓
Appearance	Should be Free From foreign particles	✓

APPLICATION GUIDELINES

CAUSES AND RECOMMENDATION FOR AVOIDING FAILURES ARE:

- USE GOOD QUALITY PLYWOOD AND ADHESIVE
- THE SURFACE TO BE BONDED SHOULD BE FREE FROM OIL/GREASE/DUST AND EXCESS MOISTURE
- INSUFFICIENT AMOUNT OF ADHESIVE ON EITHER OR BOTH THE SURFACE TO BE BONDED

When ready for bonding the spread film of most contact adhesive will exhibit a uniform semi-gloss appearance over the entire surface of the material to be bonded. Marked variation in appearance will generally indicate an improper or non-uniform bonding in those areas where insufficient adhesive has been applied. If this occurs, re-coating the surface should achieve a uniform coating. Double coating the edges with adhesive is advisable because of the higher porosity of the substrate edge.

- INSUFFICIENT BONDING PRESSURE

To ensure intimate contact necessary for an adequate bond, sufficient pressure should be applied over the entire area using as much pressure as possible without damaging the assembly. Pinch rollers (rotary press) and heavy weighted rollers are ideal. Hand pressure rolling is adequate, provided the operator exerts maximum pressure by means of a two-handled or single long-handled roller. The rollers should be of steel or hard solid rubber (50-80 diameter) and not over 75mm (3 inches) wide. Hand rolling should be repeated twice.

- BONDING WHEN ADHESIVE SURFACE IS OVER-DRY OR UNDER-DRY

Care should be taken to follow the manufacturer's recommendations concerning the allowable tack range of the adhesive. If the assembly is done before the adhesive is dry or after the allowable open time is exceeded, then the bonding result may be unsatisfactory.

- BONDING OF SURFACE UNDER 21 deg. C (70 deg. F)

Note :

1. तैमिनेट तन्मने से पहले पूरी तरह से जाँच लें।
2. तैमिनेट तन्मने के बाद बल, कसर और दसर हो तो कंपनी की कोई गैरन्टी नहीं रहेगी।
3. कोई भी परिस्थिति में कंपनी की वारंटी तैमिनेट तक सीमित रहेगी।

A LOOK AT HOW YOU CAN LOOK AFTER OUR LAMINATES

- Do not place frying pans or dishes directly from the oven or cook-top on the Laminate surface. Protect the surface from heat generating appliances.
- Do not use knives, keys or other sharp objects directly on the decorative surface. A chopping board or counter saver is recommended.
- To clean the surface, use a damp cloth or sponge and a mild soap or detergent.
- Difficult stains such as coffee or tea can be removed using a mild household cleaner or detergent and a soft-bristled brush, repeat if necessary.
- Acidic or abrasive cleaners can damage Laminate surfaces; please do not use them.
- Toilet cleaners contain harsh chemicals that can cause permanent damage. If spills occur, please wipe immediately, wash the surface with soapy water and rinse several times.
- If a stain persists, use a paste of baking soda and water and apply with a soft-bristled brush. Light scrubbing with about 10 to 20 strokes should remove most stains. Although baking soda is a low abrasive, excessive scrubbing or exerting too much force could damage the decorative surface.
- Steel wool and other abrasive pads can damage Laminates. Do not use them for cleaning and do not place steel wool pads on your counter-tops as the metal can rust and leave stains.
- Hair, textile and food dyes can cause permanent stains. If any dye should happen to inadvertently spill, please wipe it immediately with a dish-washing detergent or an all-purpose cleaner.

Unless otherwise indicated by the manufacturer the temperature of the gluing area and all materials should be 21 deg. C (70 deg. F) or above.

- BONDING OF SURFACE WHERE HUMIDITY IS TOO HIGH
Experience has shown that when the relative humidity is above 80 percent at temperatures of 21 deg. C (70 deg. F) or lower moisture may condense on the surface during drying (Known as "blushing ") and will prevent an acceptable bond. Hot spray or forced air drying may be used to prevent this condition.

- IMPROPERLY PREPARED OR DIRTY GLUING SURFACES
The surfaces should be clear, dry and free of oils or other contaminants, such as dust, loose sand particles, and so forth. The adhesive film should have full contact with the surface to which it is applied in order to give maximum adhesion.

- FIELD BONDING OF OVERSIZED SHEETS
It is recommended that the maximum sheet size used for vertical field application be limited to 610x2400mm (2x8 Feet). If larger panels are required, these should be fabricated in the shop.

- UNDER PRESSURE
After bonding, even pressure of 100 gm/ sq.ft. must be maintained for 6 to 8 hours.

Notes:

- It is recommended to check the laminate sheet before fixing.
- No complaint shall be entertained on laminates already fixed.
- In case of any complaint, the company's liability is limited to the cost of the laminate sheet only.
- BREATHLAM Laminates reserves the right to delete, amend either totally or partially, any of the design, finishes, references and other technical specifications contained in this catalogue at any time.
- The sample Swatches in the catalogue shows Color Pattern and finishes only. It does not show the actual thickness of the product.
