

TQ TECHNO DESIGNS

Technology that elevates. Quality that endures.

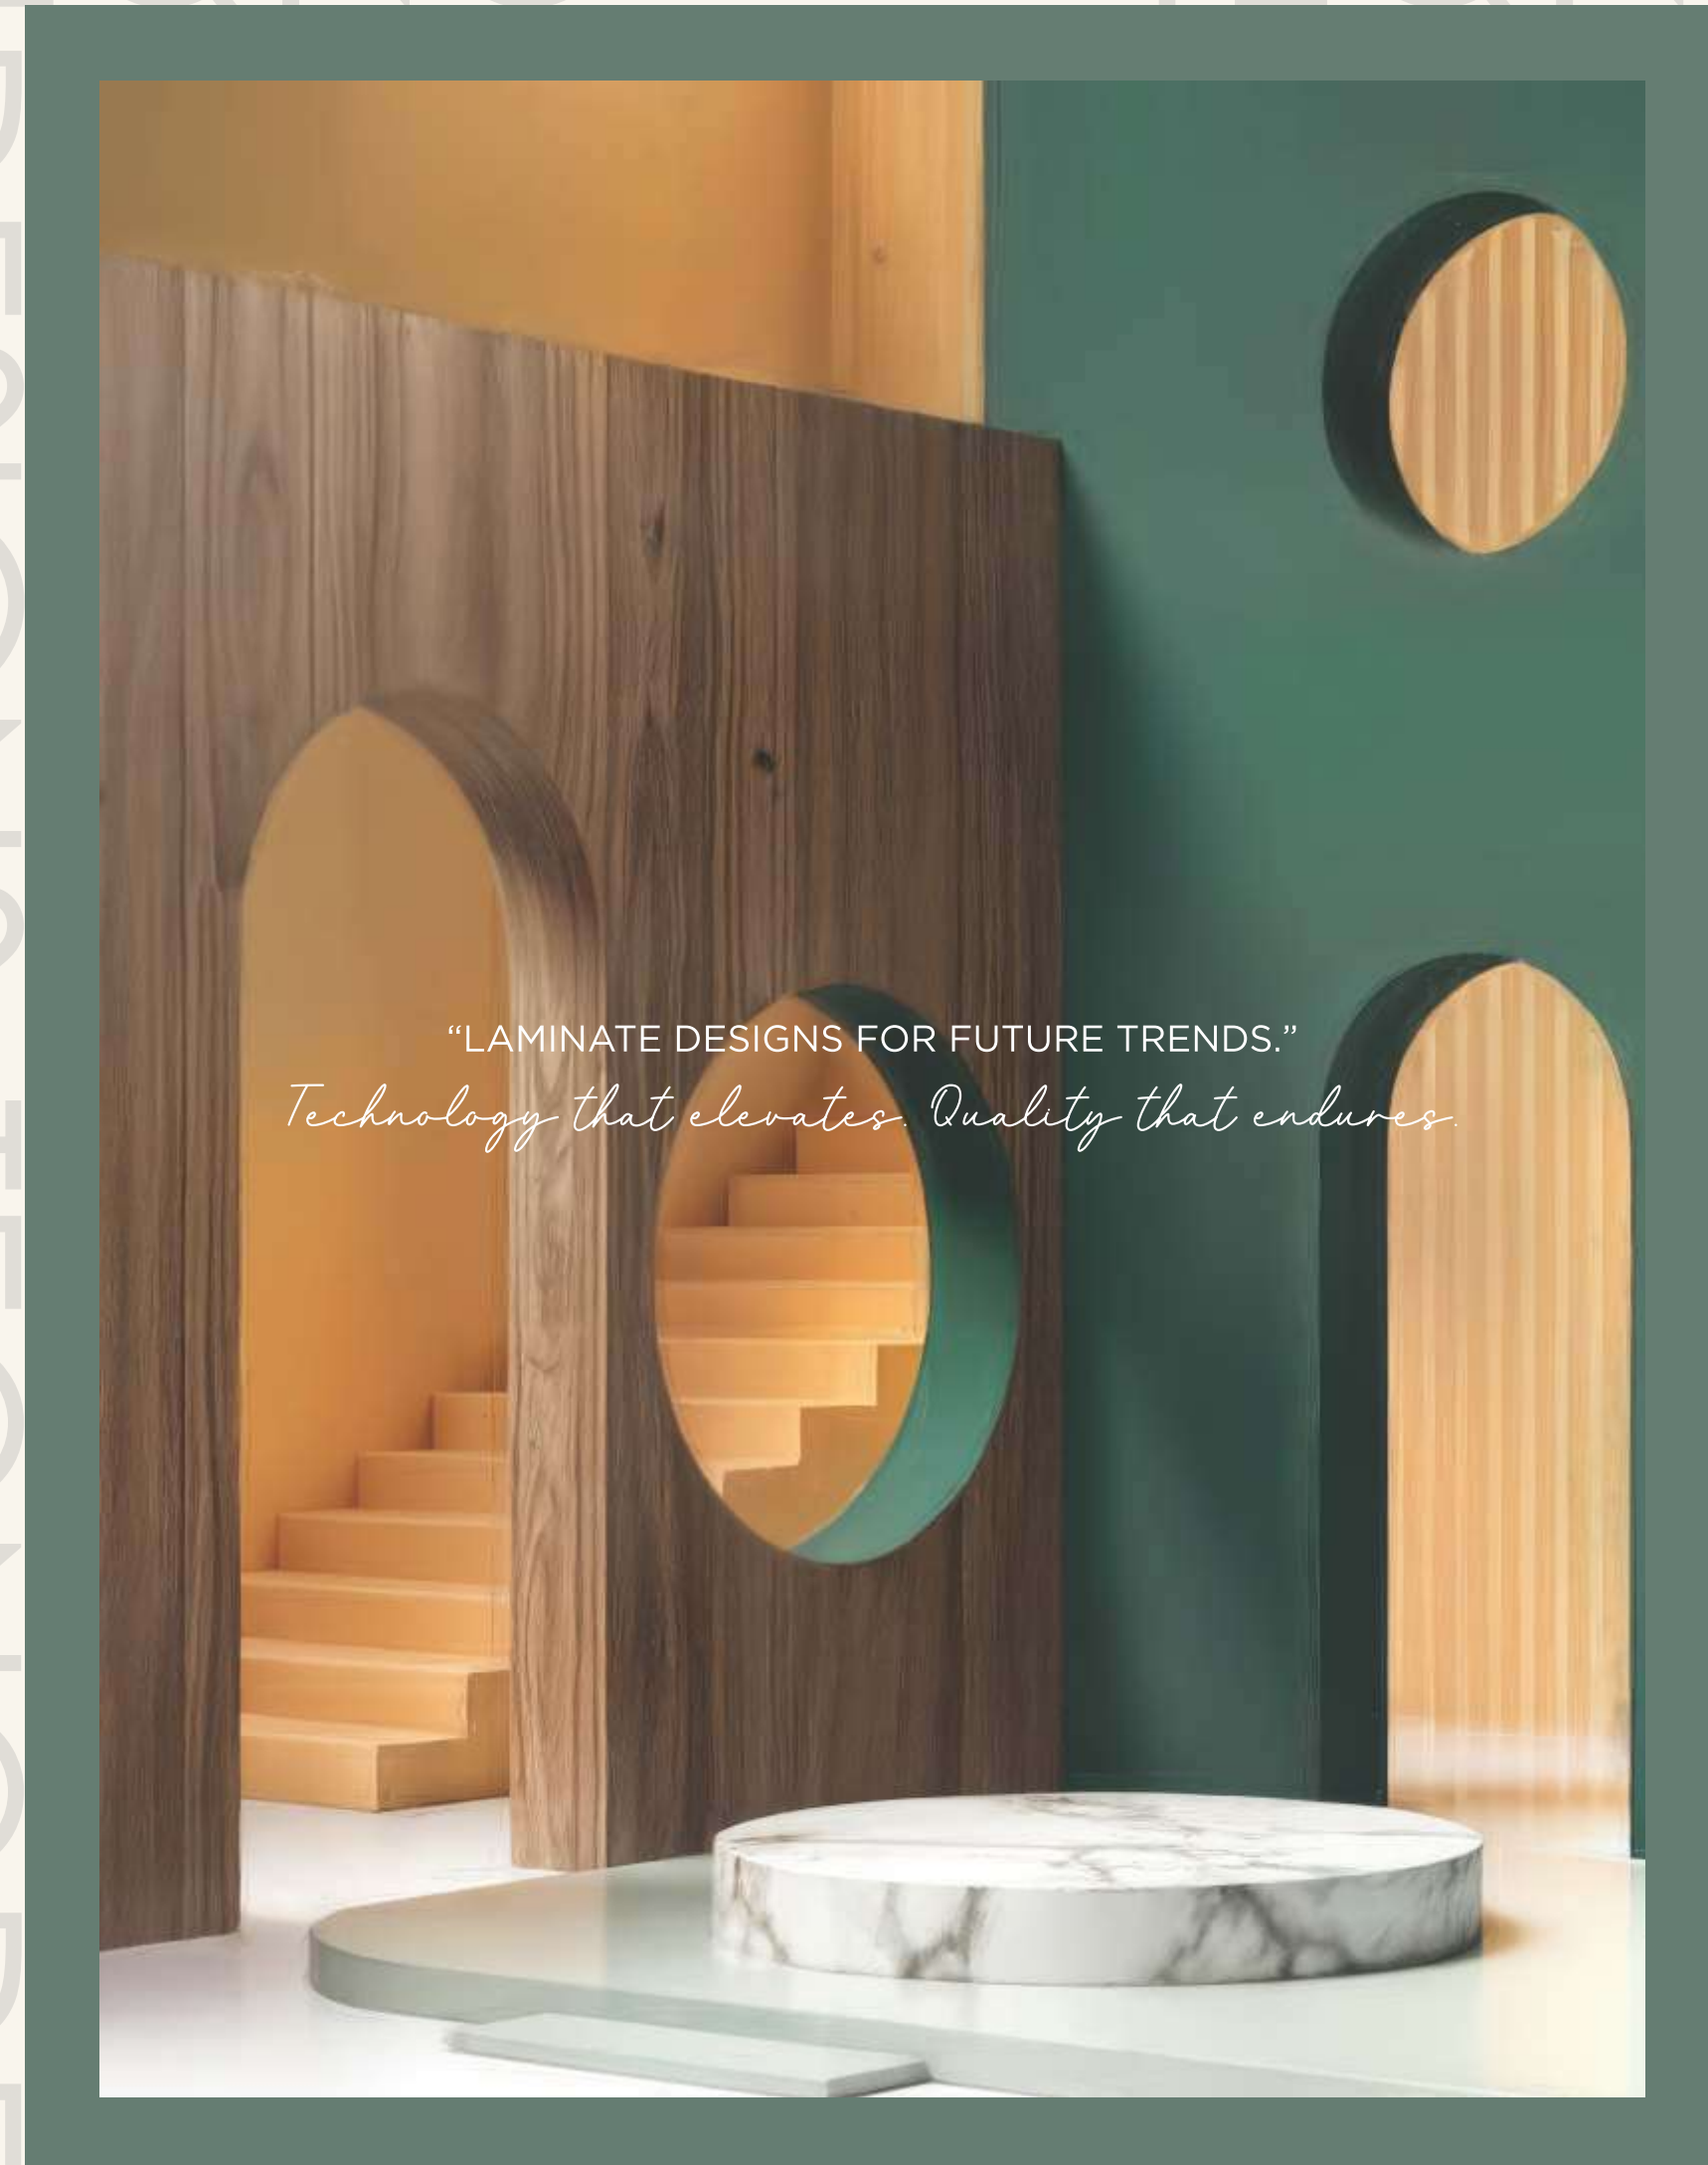

OUR STORY

Step into a universe of exquisite design possibilities with the Damas Laminates Catalog. Here, you'll discover a curated collection of premium laminates crafted to elevate your living spaces and commercial projects. From captivating textures and mesmerizing woodgrains to cutting-edge finishes and contemporary patterns, our laminates offer an unparalleled blend of style, functionality, and durability.

Each design is thoughtfully developed to inspire creativity, enhance aesthetics, and bring a refined sense of sophistication to every surface. Explore a world where innovation meets craftsmanship, and where every sheet is designed to transform ordinary spaces into extraordinary experiences.

AUTHENTIC EDGE OF VIVACIOUS DESIGNS

1.25MM EXCLUSIVE

The 1.25 mm exclusive laminate offers a refined balance of visual depth and durability, delivering a premium look without the weight of thicker options. Its modest thickness facilitates precise edge routing and tighter radii, enabling complex profiles with lower tooling wear.

1MM THICKNESS

A 1.0 mm laminate is lean and cost-efficient, ideal for lightweight applications where frequent refreshes are expected. Its slim profile reduces material costs and overall weight, making it suitable for high-volume production.

EDGE BANDING

Edge banding is a finishing process that covers exposed panel edges with a seamless strip to protect against moisture, chips, and wear while enhancing appearance. It requires clean, smooth edges, compatible adhesive and banding material, and precise trimming for a durable, tidy seam.

USP GUIDE

*technical guide to
understand advantages.*

FIRE RESISTANCE - STAIN RESISTANCE - SCRATCH RESISTANCE - TERMITE FREE - EASY TO CLEAN - MOISTURE RESISTANCE - IMPACT RESISTANCE

AUTHENTIC EDGE OF VIVACIOUS DESIGNS

1.25MM EXCLUSIVE

The 1.25 mm exclusive laminate offers a refined balance of visual depth and durability, delivering a premium look without the weight of thicker options. Its modest thickness facilitates precise edge routing and tighter radii, enabling complex profiles with lower tooling wear.

1MM THICKNESS

A 1.0 mm laminate is lean and cost-efficient, ideal for lightweight applications where frequent refreshes are expected. Its slim profile reduces material costs and overall weight, making it suitable for high-volume production.

EDGE BANDING

Edge banding is a finishing process that covers exposed panel edges with a seamless strip to protect against moisture, chips, and wear while enhancing appearance. It requires clean, smooth edges, compatible adhesive and banding material, and precise trimming for a durable, tidy seam.

WEATHER RESISTANCE

Laminates and edge bands are designed to resist outdoor moisture, temperature fluctuations, and UV exposure to maintain color and integrity.

FIRE RESISTANCE

Fire-rated laminates meet specified standards to limit flame spread and reduce smoke emission in approved applications.

SCRATCH RESISTANCE - TERMITE FREE - EASY TO CLEAN - MOISTURE RESISTANCE - IMPACT RESISTANCE

ANTI BACTERIAL

Surface treatments or materials inhibit bacterial growth, promoting a cleaner, more hygienic finish.

SCRATCH RESISTANCE

Hard-wearing surface topcoats and robust edge bands resist surface abrasion and scoring.

USP GUIDE

DESIGN

AUTHENTIC EDGE OF VIVACIOUS DESIGNS

1.25MM EXCLUSIVE

The 1.25 mm exclusive laminate offers a refined balance of visual depth and durability, delivering a premium look without the weight of thicker options. Its modest thickness facilitates precise edge routing and tighter radii, enabling complex profiles with lower tooling wear.

1MM THICKNESS

A 1.0 mm laminate is lean and cost-efficient, ideal for lightweight applications where frequent refreshes are expected. Its slim profile reduces material costs and overall weight, making it suitable for high-volume production.

EDGE BANDING

Edge banding is a finishing process that covers exposed panel edges with a seamless strip to protect against moisture, chips, and wear while enhancing appearance. It requires clean, smooth edges, compatible adhesive and banding material, and precise trimming for a durable, tidy seam.

LONG LASTING

Durable composites and quality finishes ensure prolonged performance under typical use.

DIMENSIONALLY STABLE

Materials are engineered to minimize expansion, contraction, and warping with humidity and temperature changes.

EASY TO MAINTAIN

Surfaces clean easily with routine cleaning, requiring minimal special care.

ECO-CONSCIOUS MANUFACTURING

Production emphasizes sustainable sourcing, reduced emissions, and recyclability.

SCRATCH RESISTANCE - TERMITE FREE - EASY TO CLEAN - MOISTURE RESISTANCE - IMPACT RESISTANCE

A showcase of design excellence and surface innovation. Engineered for strength, styled for sophistication. Redefining surfaces for modern spaces.

TEQNO EXPERIENCE

Designed for optimal product display, the laminate catalog features an intuitive layout with clear imagery, swatches, and simple filters. Interactive previews and a clean comparison tool help users assess finishes and specs quickly, while the design remains responsive across desktop, tablet, and mobile devices.

Built for tech-savvy adaptability, the catalog stays fast and easy to use with scalable assets and straightforward components that accommodate growing product lines without added complexity.

Technical Specification

PROPERTIES	SPECIFIED VALUES AS PER IS 2046-1995 TYPE S,VGS	DAMAS CONFORMS
Thickness	1.0mm (± 10%)	1.0mm (± 10%)
Resistance to surface wear	> 150(revolutions)	✓
Resistance to immersion in boiling water		
-Mass increase (%)	10.0%(Max)	✓
-Thickness increase	1.8%(Max)	✓
-Appearance	Not worse than 4	✓
Dimensional stability at deviated temperature		
-Longitudinal (%)	0.55% (Max)	✓
-Transverse (%)	1.025%(Max)	✓
Dimensional stability at 200 degree C		
-Longitudinal (%)	0.375%(Max)	✓
-Transverse (%)	0.60% (Max)	✓
Resistance to impact by small diameter ball	20 N (Min)	✓
Resistance to cracking	Not worse than 4	✓
Resistance to scratching	1.75 N (Min)	✓
Resistance to staining	Not worse than 5	✓
Resistance to color change (Wool standard)		
- In Xenon ARC light	Not worse than 6	✓
- In Enclose Carbon ARC light	Not worse than 5	✓
Resistance to steam	Not worse than 4	✓
Appearance	Should be Free From foreign particles	✓

A LOOK AT HOW YOU CAN LOOK AFTER OUR LAMINATES

- Do not place frying pans or dishes directly from the oven or cook-top on the Laminate surface. Protect the surface from heat generating appliances.
- Do not use knives, keys or other sharp objects directly on the decorative surface. A chopping board or counter saver is recommended.
- To clean the surface, use a damp cloth or sponge and a mild soap or detergent.
- Difficult stains such as coffee or tea can be removed using a mild household cleaner or detergent and a soft-bristled brush, repeat if necessary.
- Acidic or abrasive cleaners can damage Laminate surfaces; please do not use them.
- Toilet cleaners contain harsh chemicals that can cause permanent damage. If spills occur, please wipe immediately, wash the surface with soapy water and rinse several times.
- If a stain persists, use a paste of baking soda and water and apply with a soft-bristled brush. Light scrubbing with about 10 to 20 strokes should remove most stains. Although baking soda is a low abrasive, excessive scrubbing or exerting too much force could damage the decorative surface.
- Steel wool and other abrasive pads can damage the Laminates. Do not use them for cleaning and do not place steel wool pads on your counter-tops as the metal can rust and leave stains.
- Hair, textile and food dyes can cause permanent stains. If any dye should happen to inadvertently spill, please wipe it immediately with a dish-washing detergent or an all-purpose cleaner.

APPLICATION GUIDELINES

CAUSES AND RECOMMENDATION FOR AVOIDING FAILURES ARE:

- USE GOOD QUALITY PLYWOOD AND ADHESIVE
- THE SURFACE TO BE BONDED SHOULD BE FREE FROM OIL/GREASE/DUST AND EXCESS MOISTURE
- INSUFFICIENT AMOUNT OF ADHESIVE ON EITHER OR BOTH THE SURFACE TO BE BONDED

When ready for bonding the spread film of most contact adhesive will exhibit a uniform semi-gloss appearance over the entire surface of the material to be bonded. Marked variation in appearance will generally indicate an improper or non-uniform bonding in those areas where insufficient adhesive has been applied. If this occurs, re-coating the surface should achieve a uniform coating. Double coating the edges with adhesive is advisable because of the higher porosity of the substrate edge.

- INSUFFICIENT BONDING PRESSURE

Damas Laminates Pvt. Ltd.
